

Objective

Motivated and hardworking role model with a strong interest in cloud computing, DevOps, software engineering. Eager to contribute to innovative teams through apprenticeships that offer hands-on experience with cloud infrastructure, automation, and modern development practices.

Education

T-Level in Digital Production, Design & Development and EPQ
UTC Sheffield — Expected July 2026

GCSEs

Oasis Academy Don Valley, Sheffield — June 2024

- English Literature (9), History (8), English Language (7), Maths (7)
 - Biology (7), Chemistry (6), Physics (5), German (4), Business (L2 Merit)
-

Experience

Youth Club Worker/Mentor

DESA | 2022 - 2025

- Helped run activities, supported sessions, promoted volunteering, handled admin tasks, and maintained a safe environment.

Work Placement

Advanced Wellbeing Research Centre (AWRC) | January 2025 – July 2025

- Supported research projects using MATLAB and website development.
- Used motion capture software and contributed to a surgery preparation app with dashboard mock-ups.
- Presented findings in Microsoft Teams and delivered taster sessions.
- Gained experience in agile teamwork, digital prototyping, and technical documentation.

AWS Career Tour: Cloud Computing

Amazon Future Engineer & Springpod | September 2025

- Gained foundational knowledge of AWS services and cloud computing principles.
- Explored real-world applications and career paths in cloud technology.

Fujitsu: Cloud Virtual Experience

Springpod in partnership with Fujitsu | September 2025

- Learned about cloud infrastructure, deployment models, and business applications.
 - Participated in scenario-based learning and explored Fujitsu's cloud technologies.
-

Skills & Abilities

- Teamwork – Collaborated with peers and staff on group activities and tech projects.
- Communication – Presented confidently in meetings and events.
- Technical – Proficient with front end and back end language | HTML, CSS, Java, Python, PHP,
- Cloud & DevOps – Familiar with Linux, SDLC approach, cloud infrastructure, and agile workflows and I'm currently learning CI/CD pipelines, containerization, AWS and more
